

DISCUSSION OF THE AMENDMENT

Applicant has corrected some typographical errors. Specifically the structure for the intermediate uses both the stick OH and the (OH) and as a result has a carbon with two OH groups. The various names and structures for the various products are correct, for example the structures given now are chloro glycerin, chloro hydroxy propyl phosphate, chloro hydroxy propyl sulfate and chloro hydroxy propyl sulfonate as described. These corrected structures also result in the structures indicated as products materials when reacted.

Applicant respectfully that this typographical error be corrected.

Respectfully submitted;

Anthony J. O'Lenick, Jr.
